

# Software Engineer

## Job description

Better Care, a pioneering company in capturing, managing and processing clinical data, is looking for a **Software Engineer** to join its BC Link product development team to work on integrating medical devices and integrating their data in hospital information systems.

## Studies

Computer Engineering / Bachelor's Degree in Computer Science, Electronic Engineering / Bachelor's Degree in Electronics or Telecommunications Engineering / Bachelor's Degree in Telecommunications.

## We offer

- Competitive wage (€ 25,000 - € 30,000 gross / year) with supplements for objectives.
- Flexibility of hours and remote / face-to-face hybrid working day.
- Professional development.
- Training plans.

## Requirements

- Mastery of object-oriented programming and software engineering design patterns.
- Experience in the .Net Framework and the C # programming language.
- Expert in low level data communication protocols such as serial port, Bluetooth, TCP/IP.
- Expert in high-level communication protocols such as REST or webservice.
- Good level of written and spoken English.

## We value

- Experience in similar positions.
- Experience in the medical technology sector.
- Knowledge of Edge computing and cloud services.
- Knowledge of project / ticket management tools such as Jira, Trello, Zoho Desk.
- Knowledge of source code management tools such as Bitbucket, DevOps or GitHub.
- Relational (PostgreSQL, MySQL, Oracle, SQL Server) and non-relational (Mongo DB, Hadoop) databases.
- Knowledge of Health Standards (DICOM, HL7).
- Familiar with SCRUM and Agile work methodologies.
- Good communication with the different stakeholders.
- Availability to travel.
